KEY RISKS**WHAT ARE THE KEY RISKS OF THIS INVESTMENT?**

The value of the product and the income you receive from your investment may rise or fall.

These risk factors may cause you to lose some or all of your investment.

Refer to "Risk Factors" section of the Singapore Prospectus and "Risk Considerations" section of the Luxembourg Prospectus.

Market and Credit Risks**You are exposed to economic, political and regulatory risks.**

- Such risks are prevalent in developed as well as emerging markets, both of which the Fund may invest in, but these risks may be especially variable in emerging markets.

Your investments are subject to interest rate risk.

- Movements in interest rates may negatively affect the value of the Fund's investments in debt securities. Debt securities with longer-term maturities tend to be more sensitive to interest rate changes than shorter-term securities.

You are exposed to credit risks of issuers.

- If an issuer fails to make principal and interest payments when due, the value of your investment in such issuers will be adversely affected. This Fund invests in a mix of government and corporate securities where there is generally less risk of default for government securities than for corporate securities.
- The Fund may invest in low-rated, unrated or non-investment grade debt securities or instruments. Such investments may fluctuate significantly, more so than investment grade securities, and there is a greater likelihood that the issuer may default, subjecting your investment to losses.

Your investments are subject to currency movement risks.

- Securities held by the Fund may be denominated in currencies different from its base currency. The Fund may seek to hedge currency exposures or take a currency position for investment purposes, exposing your investments to losses if currencies move against these positions.

Liquidity Risks**Fund liquidity may be affected during exceptional circumstances.**

- The Fund may not be able to easily sell securities during an economic event or due to deterioration in the creditworthiness of issuers in which it invests.
- Shares of the Fund may be redeemed on any Dealing Day. However, during a period when trading on relevant exchanges or the over-the-counter market is substantially restricted or when market conditions make it impracticable to dispose of or value any of the Fund's investments, redemption of the Shares may be suspended.
- Redemptions of Shares may be deferred when more than 10% of the value of the Fund's Shares are redeemed or exchanged on any one Dealing Day.

The Fund is not listed.

- There is no secondary market for the Fund. All redemption requests should be made to the Singapore representative, either directly or through the financial advisor or distributor from whom you purchased the Fund.

Refer to the sections "Sale of Shares" and "Suspension of Valuation, Issue, Sale and Switching of Shares" of the Singapore Prospectus.

Product-Specific Risks**You are exposed to derivative risk.**

- The Fund may invest in derivatives which may be purchased on regulated markets or over-the-counter and may have less liquidity than conventional assets, exposing the Fund to higher risks and potential losses.
- The Fund may invest in structured products and derivatives such as credit-linked securities, credit default swaps, total return swaps, interest rate, index or foreign exchange swaps, futures, forwards, and options, all of which are subject to significant liquidity and counterparty risks.
- Use of derivatives may result in negative exposure to a specified yield curve or duration range or to a currency or credit, resulting in potential losses if the expected shift in the yield curve or changes in interest rates, currencies or credit spreads does not occur.
