The benchmark of the Fund: MSCI ACWI Healthcare.

For the 12 months ended 31 December 2021, the net asset value for Class SGD Acc and Class A SGD Acc (Hedged) of the Fund **increased 3.75%** and **1.67%** respectively against a gain of 19.86% for the benchmark (in Singapore Dollar terms), Class USD Dist and Class A USD Acc **increased 1.60%** and **1.72%** respectively against the benchmark, which increased 17.51% (in United States Dollar terms), Class A MYR Acc and Class A MYR Acc (Hedged) of the Fund **increased 5.32%** and **2.85%** respectively against a gain of 21.70% for the benchmark (in Malaysian Ringgit terms).

The Fund is sub-managed by Wellington Management Singapore Pte Ltd and the commentary that follows reflects the views of the sub-manager.

As of the end of December 2021, the Fund had the following country asset allocation: **United States** (73.77%), **United Kingdom** (6.38%), **Japan** (4.83%), **China** (3.03%), **Netherlands** (3.03%), **Switzerland** (1.83%), **Denmark** (1.24%), **Belgium** (0.71%) and others (1.66%) with the remaining held in cash (3.52%). The Fund maintained a low level of cash balances during the year.

The Fund's underperformance during the year was primarily driven by weak stock selection in medical technology, biopharma mid cap, and biopharma small cap. One holding that detracted from relative performance was *Zai Lab Ltd*, as shares declined ~50% throughout the year. From a stock specific perspective, the key asset *Oinlock*, via partnership with *Deciphera Pharmaceuticals*, failed its phase 3 study for the treatment of gastrointestinal stromal tumor (GIST). From a macro perspective, the stock was also weak due to rising concerns around heightened regulation from Chinese government, much like we saw this year across both the technology sector and after school tutoring industry. Furthermore, Chinese biotech stocks were weak after the Chinese Center for Drug Evaluation advocated that clinical trials replace placebos with best supportive care in the comparative arm for all cancer trials. While negatively received by the market, we view this as a positive change that supports sustainable growth of truly innovative drugs over the long-term.

The Fund's underperformance was partially offset by holding *Eli Lilly & Co* which announced that the company had received the FDA's Breakthrough Drug Therapy designation for donamemab, an investigational antibody therapy for the treatment of Alzheimer's disease. Shares of *Eli Lilly & Co* continued to rise after the company reported solid quarterly earnings results and highlighted the strong growth of newer products, like diabetes drug Trulicity, heart drug Jardiance and psoriasis treatment Taltz.

The top relative detractors from returns were **Zai Lab Ltd**, not owning **Novo Nordisk**, **TCR<sup>2</sup> TherapeuticsInc**, **Gritstone bio Inc** and **Allakos Inc**.

The key relative contributors were **UnitedHealth Group Inc**, **Eli Lilly & Co**, not owning **Medtronic Plc**, not owning **Merck & Co.**, **Merus** and an *underweight* to **Novartis AG**.

In terms of country exposure, investments in the **United States** generated most of the Fund's underperformance, while holdings in **Germany** and **Spain** contributed positively.

#### **Economic and Market Review**

The **Health Care** sector was off to a positive start this year, as the MSCI AC World Health Care Index rose 2.1% during the first quarter. The portfolio underperformed the benchmark by 352 basis points during the first quarter (in SGD terms). Within the index, performance was strongest in the biopharma small-cap sector.

In the second quarter of 2021, the MSCI AC World Health Care Index had strong performance and gained 9.4% over the period, and the portfolio underperformed the benchmark by 206 basis points in SGD terms. Within the index, performance was strongest in the biopharma mid-cap and medical technology sectors.

In the third quarter, the MSCI AC World Health Care Index gained 1.2%, outperforming the Fund by 392 basis points in SGD terms. Within the index, performance was strongest in the medical technology and biopharma large-cap sectors.

Global health care equities ended the year with a positive fourth quarter, as the MSCI AC World Health Care index increased 6.0%. The portfolio underperformed the benchmark by 525 basis points in SGD terms. Within the Index, performance was strongest in the health care services and biopharma large-cap sectors.

#### **Outlook and Fund Strategy**

COVID-19 disruptions will likely continue for many months, but we are encouraged by strong fundamentals across the healthcare industry, supported by hopes the Omicron wave could peak soon, leading the way to a more normalized investment backdrop. Within the biopharma industry, valuations are compelling as we enter 2022.

Valuations of large cap biopharma companies in aggregate have been at historic lows due to the threat of **US** drug price reform. This issue will be largely behind us soon; with that we believe investors will re-focus attention on drug pipelines, compelling innovation, and overall R&D productivity. Within small and mid-cap biopharma, the significant pullback that started in February 2021 and continued through the year has left valuations today much more compelling than a year ago. In addition, the attractive valuation backdrop, breakthrough innovation in the biopharma industry, particularly in oncology, immunology and certain rare diseases, is creating a rich opportunity set for specialist investors.

Outside of biopharma the opportunity set is equally compelling. Certain medical technology companies are seeing strong fundamentals as they help enable robust drug development and manufacturing in increasingly diverse therapeutic categories. Diagnostics companies are helping with COVID-19 testing, developing more convenient routine medical tests, and expanding into new attractive categories such as early cancer screening. Medical device companies have been impacted from COVID-19 headwinds but should see increased demand as patients resume elective procedures and the market starts to focus on very attractive pipelines.

And importantly, the overall delivery of healthcare continues to evolve. The **US**, for example, is experiencing a decades-long transition toward a fee-for-value payment system from an historic fee-for-service approach. These tailwinds across the various healthcare subsectors, coupled with strong valuation support, leaves us with a positive outlook for the **Health Care** sector in 2022.

#### D) Exposure to derivatives

The global exposure relating to derivative instruments is calculated using the commitment approach:

(i) the absolute value of the exposure of each individual financial derivative not involved in netting or hedging arrangements;

(ii) the absolute value of the net exposure of each individual financial derivative after netting or hedging arrangements; and

(iii) the sum of the values of cash collateral received under certain cases.

i) Fair value of derivative contracts and as a percentage of NAV as at 31 December 2021

	Contract or underlying principal amount \$	Positive fair value \$	% of NAV	Negative fair value \$	% of NAV
Foreign currency contracts	96,148,723	474,655	0.06	56,364	0.01

#### D) Exposure to derivatives (continued)

- There was a net realised loss of SGD 3,628,792 on derivative contracts during the financial year ended 31 December 2021.
- iii) There was a net unrealised gain of SGD 418,291 on outstanding derivative contracts marked to market as at 31 December 2021.
- E) Amount and percentage of NAV invested in other schemes as at 31 December 2021

N/A

F) Amount and percentage of borrowings to NAV as at 31 December 2021

N/A

G) Amount of redemptions and subscriptions for the financial year ended 31 December 2021

Total amount of redemptions	SGD	383,326,087
Total amount of subscriptions	SGD	555,500,106

### K) Any material information that will adversely impact the valuation of the scheme such as contingent liabilities of open contracts

N/A

#### L) For schemes which invest more than 30% of their deposited property in another scheme, the following key information on the second-mentioned scheme ("the underlying scheme")<sup>1</sup> should be disclosed as well

 Top 10 holdings at fair value and as percentage of NAV as at 31 December 2021 and 31 December 2020

N/A

ii) Expense ratios for the financial year ended 31 December 2021 and 31 December 2020

N/A

iii) Turnover ratios for the financial year ended 31 December 2021 and 31 December 2020

N/A

<sup>1</sup> Where the underlying scheme is managed by a foreign manager which belongs to the same group of companies as, or has a formal arrangement or investment agreement with, the Singapore manager, the above information should be disclosed on the underlying scheme. In other cases, such information on the underlying scheme should be disclosed only if it is readily available to the Singapore manager.

#### M) Soft dollar commissions/arrangements

UOB Asset Management has entered into soft dollars arrangements with selected brokers from whom products and services are received from third parties. The products and services relate essentially to computer hardware and software to the extent that they are used to support the investment decision making process, research and advisory services, economic and political analyses, portfolio analyses including performance measurements, market analyses, data and quotation services, all of which are believed to be helpful in the overall discharge of UOB Asset Management's duties to clients. As such services generally benefit all of UOB Asset Management's clients in terms of input into the investment decision making process, the soft credits utilised are not allocated on a specific client basis. The Manager confirms that trades were executed on a best execution basis and there was no churning of trades.

The Sub-Manager, Wellington Management Singapore Pte Ltd and their affiliates (collectively, the "Wellington Management Group") may utilise external research provided by broker/dealers and independent, or third-party research firms in their investment decision-making process ("Research Services"). These Research Services include written research material, conversations with analysts at the research firms, meetings with corporate management and access to experts in a variety of fields, such as government officials, doctors, researchers, lawyers and scientists.

## N) Where the scheme offers pre-determined payouts, an explanation on the calculation of the actual payouts received by participants and any significant deviation from the pre-determined payouts

N/A

#### REPORT OF THE TRUSTEE

The Trustee is under a duty to take into custody and hold the assets of United Global Healthcare Fund (the "Fund") in trust for the unitholders. In accordance with the Securities and Futures Act 2001, its subsidiary legislation and the Code on Collective Investment Schemes, the Trustee shall monitor the activities of the Manager for compliance with the limitations imposed on the investment and borrowing powers as set out in the Trust Deed in each annual accounting year and report thereon to unitholders in an annual report.

To the best knowledge of the Trustee, the Manager has, in all material respects, managed the Fund during the financial year covered by these financial statements, set out on pages 17 to 61, in accordance with the limitations imposed on the investment and borrowing powers set out in the Trust Deed.

For and on behalf of the Trustee STATE STREET TRUST (SG) LIMITED

Authorised signatory 28 March 2022

#### STATEMENT BY THE MANAGER

In the opinion of UOB Asset Management Ltd, the accompanying financial statements set out on pages 17 to 61, comprising the Statement of Total Return, Statement of Financial Position, Statement of Movements of Unitholders' Funds, Statement of Portfolio and Notes to the Financial Statements are drawn up so as to present fairly, in all material respects, the financial position and portfolio holdings of United Global Healthcare Fund (the "Fund") as at 31 December 2021, and the financial performance and movements of unitholders' funds for the year then ended in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Investment Funds" issued by the Institute of Singapore Chartered Accountants. At the date of this statement, there are reasonable grounds to believe that the Fund will be able to meet its financial obligations as and when they materialise.

For and on behalf of the Manager UOB ASSET MANAGEMENT LTD

THIO BOON KIAT Authorised signatory 28 March 2022

### INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF UNITED GLOBAL HEALTHCARE FUND

#### **Our Opinion**

In our opinion, the accompanying financial statements of United Global Healthcare Fund (the "Fund"), are properly drawn up in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Investment Funds" issued by the Institute of Singapore Chartered Accountants, so as to present fairly, in all material respects, the financial position and portfolio holdings of the Fund as at 31 December 2021, and the financial performance and movements of unitholders' funds for the financial year ended on that date.

#### What we have audited

The financial statements of the Fund comprise:

- the Statement of Total Return for the financial year ended 31 December 2021;
- the Statement of Financial Position as at 31 December 2021;
- the Statement of Movements of Unitholders' Funds for the financial year ended 31 December 2021;
- the Statement of Portfolio as at 31 December 2021; and
- the Notes to the Financial Statements, including a summary of significant accounting policies.

#### **Basis for Opinion**

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Independence

We are independent of the Fund in accordance with the Accounting and Corporate Regulatory Authority Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code.

#### Other Information

The Fund's Manager (the "Manager") is responsible for the other information. The other information comprises all sections of the annual report but does not include the financial statements and our auditor's report thereon.

### INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF UNITED GLOBAL HEALTHCARE FUND

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Manager for the Financial Statements

The Manager is responsible for the preparation and fair presentation of these financial statements in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Investment Funds" issued by the Institute of Singapore Chartered Accountants and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to terminate the Fund or to cease the Fund's operations, or has no realistic alternative but to do so.

The Manager's responsibilities include overseeing the Fund's financial reporting process.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

 Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

### INDEPENDENT AUDITOR'S REPORT TO THE UNITHOLDERS OF UNITED GLOBAL HEALTHCARE FUND

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers LLP Public Accountants and Chartered Accountants Singapore, 28 March 2022

#### 1 General

United Global Healthcare Fund (the "Fund") is a Singapore-registered trust fund constituted under a Trust Deed between UOB Asset Management Ltd (the "Manager") and State Street Trust (SG) Limited (the "Trustee"). The Trust Deed is governed by the laws of the Republic of Singapore.

The investment objective of the Fund is to achieve long term capital growth by investing in securities issued by companies principally involved in the development, production or distribution of products, equipment and/or services related to healthcare, in any part of the world. Such investments would include investing in sub-sectors of the healthcare industry such as medical products, health services, major pharmaceuticals, specialty major pharmaceuticals, and specialty pharmaceuticals.

The Fund currently offers six classes of units, namely:

- Class SGD Acc (denominated in the Singapore Dollar)
- Class USD Dist (denominated in the United States Dollar)
- Class A SGD Acc (Hedged) (denominated in the Singapore Dollar)
- Class A USD Acc (denominated in the United States Dollar)
- Class A MYR Acc (denominated in the Malaysian Ringgit)
- Class A MYR Acc (Hedged) (denominated in the Malaysian Ringgit)

"Acc" refers to Accumulation classes which do not declare or pay distribution but accumulate investment gains and income in their net asset values ("NAV").

"Dist" refers to Distribution classes which declares and pays distribution in accordance with the applicable distribution policies.

Hedged classes allow the Manager to adopt currency hedging strategies and use currency hedging transactions to reduce the effect of exchange rate fluctuations between the currency in which the relevant Hedged classes is denominated against the currency in which the underlying investments are denominated. The costs and expenses associated with the hedging transactions and any benefits of the hedging transactions will accrue to the hedged classes only.

Subscriptions and redemptions of the units are denominated in the Singapore Dollar, the United States Dollar and the Malaysian Ringgit.

For the financial year ended 31 December 2021

#### 2 Significant accounting policies

#### (a) Basis of preparation

The financial statements have been prepared under the historical cost convention, modified by the revaluation of financial assets held at fair value through profit or loss, and in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Investment Funds" revised and issued by the Institute of Singapore Chartered Accountants in July 2020 for the financial year beginning on or after 1 July 2020.

The adoption of the revised RAP 7 did not result in substantial changes to the accounting policies of the Fund and had no material effect on the amounts reported for the current or prior years.

#### (b) Recognition of income

Dividend income is recognised when the right to receive payment is established. Interest income is recognised on a time proportion basis using the effective interest method.

#### (c) Investments

Investments are classified as financial assets at fair value through profit or loss.

#### (i) Initial recognition

Purchases of investments are recognised on the trade date. Investments are recorded at fair value on initial recognition.

#### (ii) Subsequent measurement

Investments are subsequently carried at fair value. Net changes in fair value on investments are included in the Statement of Total Return in the year in which they arise.

#### (iii) Derecognition

Investments are derecognised on the trade date of disposal. The resultant realised gains and losses on the sale of investments are computed on the basis of the difference between the weighted average cost and selling price gross of transaction costs, and are taken up in the Statement of Total Return.

For the financial year ended 31 December 2021

2 Significant accounting policies (continued)

#### (d) Basis of valuation of investments

The fair value of financial assets and liabilities traded in active markets is based on last traded market prices for equities and market mid prices for the quoted debt securities on the financial year end date. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of fair value. Accrued interest or discount or premium on debt securities at financial year end date is included in the fair value of debt securities. Interest income on debt securities is presented within "Net gains/losses on investments" on the Statement of Total Return.

#### (e) Foreign currency translation

#### (i) Functional and presentation currency

The performance of the Fund is measured and reported to the investors in the Singapore Dollar. The Manager considers the Singapore Dollar as the currency of the primary economic environment in which the Fund operates. The financial statements are presented in the Singapore Dollar, which is the Fund's functional and presentation currency.

#### (ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Total Return. Translation differences on non-monetary financial assets and liabilities are also recognised in the Statement of Total Return within "Net gains/losses on investments".

#### (f) Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Receivables are initially recognised at their fair value and subsequently carried at amortised cost using the effective interest method, less accumulated impairment losses.

#### (g) Sales and purchases awaiting settlement

Sales and purchases awaiting settlement represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the Statement of Financial Position date respectively. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

For the financial year ended 31 December 2021

2 Significant accounting policies (continued)

#### (h) Cash and bank balances

Cash and bank balances comprise cash at banks which are subject to an insignificant risk of changes in value.

#### (i) Payables

Payables are recognised initially at fair value and subsequently stated at amortised cost using the effective interest method.

#### (j) Financial derivatives

Financial derivatives including forwards and swaps may be entered into for the purposes of efficient portfolio management, tactical asset allocation or specific hedging of financial assets held as determined by the Manager and in accordance with the provision of the Trust Deed and the Code on Collective Investment Schemes.

Financial derivatives outstanding on the financial year end date are valued at the forward rate or at the current market prices using the "mark-to-market" method, as applicable, and the resultant gains and losses are taken up in the Statement of Total Return.

#### (k) Distributions

The Manager has the absolute discretion to determine whether a distribution is to be made. In such an event, an appropriate amount will be transferred to a distribution account, to be paid out on the distribution date. The amount shall not be treated as part of the property of the Fund. Distributions are accrued for at the financial year end date if the necessary approvals have been obtained and a legal or constructive obligation has been created.

#### (I) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

For the financial year ended 31 December 2021

3 Income tax

	2021 \$	2020 \$
Overseas income tax	1,355,914	890,351

The Trustee of the Fund has assessed and is satisfied that the Fund has met the requisite conditions under the Designated Unit Trust ("DUT") Scheme for the current financial year. The Trustee of the Fund will ensure that the Fund fulfills its reporting obligations under the DUT Scheme.

Under the DUT Scheme, subject to certain conditions and reporting obligations being met, certain income of the DUT Fund is not taxable in accordance with Sections 35(12) and 35(12A) of the Income Tax Act 1947. Such income includes:

- (i) gains or profits derived from Singapore or elsewhere from the disposal of securities;
- (ii) interest (other than interest for which tax has been deducted under Section 45 of the Income Tax Act 1947);
- (iii) dividends derived from outside Singapore and received in Singapore;
- gains or profits derived from foreign exchange transactions, transactions in futures contracts, transactions in interest rate or currency forwards, swaps or option contracts and transactions in forwards, swaps or option contracts relating to any securities or financial index;
- discount, prepayment fee, redemption premium and break cost from qualifying debt securities issued during the prescribed period; and
- (vi) distributions from foreign unit trusts derived from outside Singapore and received in Singapore.

The overseas income tax represents tax withheld on foreign sourced income.

The Fund is required to recognise a tax liability when it is probable that the tax laws of foreign countries require a tax liability to be assessed on the Fund's gains on investments sourced from such foreign countries, assuming the relevant taxing authorities have full knowledge of all the facts and circumstances. The tax liability is then measured at the amount expected to be paid to the relevant taxation authorities using the tax laws and rates that have been enacted or substantively enacted by the end of the financial year. There is sometimes uncertainty about the way enacted tax law is applied to offshore investment funds. This creates uncertainty about whether or not a tax liability will ultimately be paid by the Fund. Therefore when measuring any uncertain tax liabilities, management considers all of the relevant facts and circumstances available at the time which could influence the likelihood of payment, including any formal or informal practices of the relevant tax authorities.

For the financial year ended 31 December 2021

3 Income tax (continued)

As at 31 December 2021 and 2020, the Fund has uncertain taxes exposure with respect to gains on investment of which the tax liability is estimated to be insignificant. While this represents the Manager's best estimate, the estimated value could differ significantly from the amount ultimately payable.

For the financial year ended 31 December 2021

#### 9 Financial risk management

The Fund's activities expose it to a variety of market risk (including foreign exchange risk, price risk and interest rate risk), liquidity risk and credit risk. The Fund's overall risk management programme seeks to minimise potential adverse effects on the Fund's financial performance. The Fund may use financial futures contracts, financial options contracts and/or foreign currency contracts subject to the terms of the Trust Deed to moderate certain risk exposures. Specific guidelines on exposures to individual securities and certain industries are in place for the Fund at any time as part of the overall financial risk management to reduce the Fund's risk exposures.

The Fund's assets principally consist of financial instruments such as equity investments, fixed interest investments and cash. They are held in accordance with the published investment policies of the Fund. The allocation of assets between the various types of investments is determined by the Manager to achieve its investment objectives.

For the financial year ended 31 December 2021

9 Financial risk management (continued)

#### (a) Market risk

Market risk is the risk of loss arising from uncertainty concerning movements in market prices and rates, including observable variables such as interest rates, credit spreads, exchange rates, and others that may be only indirectly observable such as volatilities and correlations. Market risk includes such factors as changes in economic environment, consumption pattern and investor's expectation etc. which may have significant impact on the value of the investments. The Fund's investments are substantially dependent on changes in market prices and are monitored by the Manager on a regular basis so as to assess changes in fundamentals and valuation. Although the Manager makes reasonable efforts in the choice of investments, events beyond reasonable control of the Manager could affect the prices of the underlying investments and hence the asset value of the Fund. Guidelines are set to reduce the Fund's risk exposures to market volatility such as diversifying the portfolio by investing across various geographies and industries, alternatively, the Fund may be hedged using derivative strategies.

#### (i) Foreign exchange risk

The Fund has monetary financial assets and liabilities denominated in currencies other than the Singapore Dollar and it may be affected favourably or unfavourably by exchange rate regulations or changes in the exchange rates between the Singapore Dollar and such other currencies. The Manager may at his discretion, implement a currency management strategy either to reduce currency volatility or to hedge the currency exposures of the Fund.

For the financial year ended 31 December 2021

9 Financial risk management (continued)

#### (a) Market risk (continued)

#### (i) Foreign exchange risk (continued)

Investments, which is the significant item in the Statement of Financial Position, is exposed to foreign exchange risk and interest rate risk. Foreign exchange risk sensitivity analysis is prepared and disclosed only for monetary assets and liabilities. The table below summarises the sensitivity of the Fund's monetary assets and liabilities to changes in foreign exchange movements as at 31 December 2021 and 2020. The analysis is based on the assumptions that the functional currency increased/decreased to the relevant foreign exchange rates as disclosed below. This represents the Manager's best estimate of a reasonable possible shift in the foreign exchange rates, having regard to historical volatility of those rates.

	2	2021	2020		
Currency	Volatility ∾	Net impact to net assets attributable to unitholders	Volatility	Net impact to net assets attributable to unitholders	
	%	\$	%	\$	
MYR USD	3 4	2,245,430 2,360,470	3 4	3,094,567 3,983,519	
	-	_,,	-	-,,	

#### (ii) Price risk

The COVID-19 pandemic continues to evolve and develop. The situation is dynamic with various cities and countries around the world responding in different ways to address the pandemic. As a result of the COVID-19 pandemic, global financial markets have experienced significant volatility. Given the extent of the crisis, it is difficult to estimate the impact or duration of the volatility on the portfolio of the Fund. The Manager is closely monitoring the development of the COVID-19 pandemic and its related impact.

Price risk is the risk of potential adverse changes to the value of financial investments because of changes in market conditions and volatility in security prices.

For the financial year ended 31 December 2021

- 9 Financial risk management (continued)
- (a) Market risk (continued)

#### (ii) Price risk (continued)

The table below summarises the impact of increases/decreases from the Fund's investments in equities on the Fund's net assets attributable to unitholders at 31 December 2021 and 2020. The analysis is based on the assumption that the index components within the benchmark increased/decreased by a reasonable possible shift, with all other variables held constant and that the prices of the Fund's investments moved according to the historical correlation with the index.

	2021		2020	
Benchmark component	Volatility	Net impact to net assets attributable to unitholders	Volatility	Net impact to net assets attributable to unitholders
	%	\$	%	\$
MSCI ACWI Healthcare	20	166,707,127	20	142,262,326

#### (iii) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow. The Fund holds interest bearing securities that expose the Fund to fair value interest rate risk. The Fund holds securities of varying maturities and interest rate sensitivities. Movement in market interest rates will affect the valuation of the Fund's securities by varying degrees. The Fund's policy requires the Manager to manage this risk by measuring the mismatch of the interest rate sensitivity gap of financial assets and liabilities and calculating the average duration of the sensitivity of the fair value of the Fund's fixed interest securities to changes in market interest rates.

For the financial year ended 31 December 2021

- 9 Financial risk management (continued)
- (a) Market risk (continued)

#### (iii) Interest rate risk (continued)

The tables below summarise the Fund's exposure to interest rate risks. They include the Fund's assets and trading liabilities at fair value, categorised by interest rate types.

	Variable rates \$	Fixed rate \$	Non-interest bearing \$	Total \$

As at 31 December 2021 and 2020, should interest rates have lowered or risen by the respective basis points ("bps") as disclosed below with all other variables remaining constant, the increase or decrease in net assets attributable to unitholders for the year would be as follows:

	2021			2020
	Volatility bps	Net impact to net assets attributable to unitholders \$	Volatility bps	Net impact to net assets attributable to unitholders \$
United Global Healthcare Fund	50	642	50	1,634

For the financial year ended 31 December 2021

- 9 Financial risk management (continued)
- (a) Market risk (continued)

#### (iii) Interest rate risk (continued)

The Fund has direct exposure to interest rate changes on the valuation and cash flows of its interest bearing assets and liabilities. However, it may also be indirectly affected by the impact of changes on the earnings of certain companies in which the Fund invests and impact on the valuation of certain over-the-counter derivative products that use market interest rates as an input. Therefore, the above sensitivity analysis may not fully indicate the total effect on the Fund's net assets attributable to unitholders of future movements in interest rates.

#### (b) Liquidity risk

The Fund is exposed to daily cash redemptions and disbursements for the settlements of purchases. The Manager therefore ensures that the Fund maintains sufficient cash and bank balances and that it is able to obtain cash from the sale of investments held to meet its liquidity requirements. Reasonable efforts will be taken to invest in securities which are traded in a relatively active market and which can be readily disposed of.

The Fund's investments in quoted securities are considered to be readily realisable as they are quoted on established regional stock exchanges.

The Manager may from time to time employ derivatives to implement a portfolio strategy to reduce risk or for the purpose of efficient portfolio management. Market liquidity of complex derivatives are significantly less than traditional investment instruments and such positions may therefore require a longer time to reverse than would typically be expected for traditional investment instruments.

For the financial year ended 31 December 2021

9 Financial risk management (continued)

#### (b) Liquidity risk (continued)

The tables below analyse the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the financial year end to the contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

	Less than 3 months \$	3 months to 1 year \$	Over 1 year \$

- outflow	(14,416,485)	-	-

#### (c) Credit risk

Credit risk is the risk that a counterparty will fail to perform contractual obligations, either in whole or in part, under a contract.

Concentrations of credit risk are minimised primarily by:

- ensuring counterparties, together with the respective credit limits, are approved,
- ensuring that transactions are undertaken with a large number of counterparties, and
- ensuring that the majority of transactions are undertaken on recognised exchanges.

For the financial year ended 31 December 2021

- 9 Financial risk management (continued)
- (c) Credit risk (continued)

As such, the Fund does not have a concentration of credit risk that arises from an exposure to a single counterparty. Furthermore, the Fund does not have a material exposure to group of counterparties which are expected to be affected similarly by changes in economic or other conditions.

The table below analyses the Fund's investments by credit ratings as rated by Moody's expressed as a percentage of net assets attributable to unitholders. The credit ratings are reviewed regularly.

	Debt sec	urities	
20	21	20	20
Fixed Rate securities	Floating Rate securities	Fixed Rate securities	Floating Rate securities
1%	-	_*	-

Aaa

\* denotes amount less than 1%

All transactions in listed securities are settled/paid upon delivery and transacted with approved counterparties using an approved list of brokers that is regularly assessed and updated by the Manager. The risk of default is considered minimal, as delivery of securities is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

For the financial year ended 31 December 2021

#### 9 Financial risk management (continued)

#### (c) Credit risk (continued)

Credit risk also arises from cash and bank balances and derivative positions held with financial institutions. The table below summarises the credit rating of banks and custodians in which the Fund's assets are held as at 31 December 2021 and 2020.

The credit ratings are based on the Viability ratings published by Fitch.

	Credit rating as at 31 December 2021	Credit rating as at 31 December 2020
Bank and custodian		
State Street Bank and Trust Company	aa-	aa-
Counterparties of foreign currency contracts		
Australia and New Zealand Banking Group	a+	a+
BNP Paribas	a+	a+
The Hongkong and Shanghai Banking Corporation Limited	n/a*	a+
State Street Bank and Trust Company	aa-	aa-
Northern Trust Company	aa-	aa-
United Overseas Bank Limited	aa-	aa-
JP Morgan Chase Bank NA	aa-	n/a*
CIMB Bank BHD	non-rated	n/a*

\* The Fund has no exposure to the counterparties as at 31 December 2021 or 2020.

The maximum exposure to credit risk at the financial year end date is the carrying amount of the portfolio of investments and cash and bank balances as presented in Statement of Financial Position.

For purposes of impairment assessment, the Fund's assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

For the financial year ended 31 December 2021

9 Financial risk management (continued)

#### (d) Capital management

The Fund's capital is represented by the net assets attributable to unitholders. The Fund strives to invest the subscriptions of redeemable participating units in investments that meet the Fund's investment objectives while maintaining sufficient liquidity to meet unitholder redemptions.

#### (e) Fair value estimation

The Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

For the financial year ended 31 December 2021

#### 9 Financial risk management (continued)

#### (e) Fair value estimation (continued)

The following tables analyse within the fair value hierarchy, the Fund's financial assets and liabilities (by class) measured at fair value at 31 December 2021 and 2020:

Level 1 \$	Level 2 \$	Level 3 \$	Total \$
-	5,918,276	-	5,918,276
815,263,324	-	-	815,263,324
			474,655
815,263,324	6,392,931		821,656,255
-	56,364	-	56,364
		-	56,364
			Total
			\$
Ψ	Ψ	Ψ	Ψ
-	2.841.398	-	2,841,398
638,543,126	-	-	638,543,126
-	2.713.564	-	2,713,564
638,543,126		-	644,098,088
		-	472,974
	472,974	-	472,974
	\$ 815,263,324 815,263,324	\$ \$ \$ 5,918,276 815,263,324 - 474,655 815,263,324 6,392,931 - 56,364 Level 1 Level 2 \$ \$ 2,841,398 638,543,126 - 2,713,564 - 2,713,564 - - - 2,713,564 - - - - - - - - -	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

Investments whose values are based on quoted market prices in active markets, and therefore classified within Level 1, comprise of listed equities. The Fund does not adjust the quoted price for these instruments.

For the financial year ended 31 December 2021

#### 9 Financial risk management (continued)

#### (e) Fair value estimation (continued)

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include government bonds and over-the-counter derivatives.

Except for cash and bank balances which are classified as Level 1, the Fund's assets and liabilities not measured at fair value at 31 December 2021 and 2020 have been classified as Level 2. The carrying amounts of these assets and liabilities approximate their fair values as at the financial year end date.

#### (f) Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The gross and net positions of financial assets and liabilities that have been offset in the Statement of Financial Position are disclosed in the first three columns of the tables below.

Financial assets		setting on the inancial Positi		Related	amounts no	t offset

#### 10 Related party transactions

(a) The Manager and the Trustee of the Fund are UOB Asset Management Ltd and State Street Trust (SG) Limited respectively. The Manager is a subsidiary of United Overseas Bank Limited while the Trustee is a subsidiary of State Street Bank and Trust Company.

Management fee and valuation fee are paid to the Manager for the financial year. Trustee fee is paid to the Trustee while registrar fee and custody fee are paid to State Street Bank and Trust Company, Singapore Branch.

These fees paid or payable by the Fund shown in the Statement of Total Return and in the respective Notes to the Financial Statements are on terms set out in the Trust Deed. All other related party transactions are shown elsewhere in the financial statements.

(b) As at the end of the financial year, the Fund maintained the following accounts with the related parties:

	2021 \$	2020 \$
State Street Bank and Trust Company, Singapore Branch Cash and bank balances	42,951,213	12,262,743

(c) The following transactions took place during the financial year between the Fund and related parties at terms agreed between the parties:

	2021 \$	2020 \$
State Street Bank and Trust Company, Singapore Branch Interest income	-	2,933
<b>United Overseas Bank Limited</b> Bank charges Interest expense	81,445 1,279	117,413 -

For the financial year ended 31 December 2021

11 Financial ratios

	2021 \$	2020 \$
Class SGD Acc Total operating expenses Average daily net assets value Expense ratio <sup>1</sup>	11,086,306 	7,019,798 331,236,515 2.12%
Class USD Dist Total operating expenses Average daily net assets value Expense ratio <sup>1</sup>	1,989,165 	1,125,965 52,832,155 2.13%
Class A SGD Acc (Hedged) Total operating expenses Average daily net assets value Expense ratio <sup>1</sup>	314,986 	173,240 
Class A USD Acc Total operating expenses Average daily net assets value Expense ratio <sup>1</sup>	244,670 <u>11,645,899</u> 2.10%	134,306 6,444,927 2.08%
Class A MYR Acc Total operating expenses Average daily net assets value Expense ratio <sup>1</sup>	563,931 	329,218 <u>15,786,539</u> <u>2.09%</u>
Class A MYR Acc (Hedged) Total operating expenses Average daily net assets value Expense ratio <sup>1</sup>	1,922,369 	1,235,745 59,245,677 2.09%

<sup>1</sup> 

The expense ratio has been computed based on the guidelines laid down by the Investment Management Association of Singapore ("IMAS"). The calculation of the Fund's expense ratio at financial year end was based on total operating expenses divided by the average net assets value respectively for the financial year. The total operating expenses do not include (where applicable) brokerage and other transactions costs, performance fee, interest expense, distribution paid out to unitholders, foreign exchange gains/losses, front or back end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. The Fund does not pay any performance fee. The average net assets value is based on the daily balances.

For the financial year ended 31 December 2021

### 11 Financial ratios (continued)

2

	2021 \$	2020 \$
Lower of total value of purchases or sales	457,240,332	309,179,405
Average daily net assets value	774,391,655	473,771,043
Turnover ratio <sup>2</sup>	59.05%	65.26%

The portfolio turnover ratio is calculated in accordance with the formula stated in the Code on Collective Investment Schemes. The calculation of the portfolio turnover ratio was based on the lower of the total value of purchases or sales of the underlying investments divided by the average daily net asset value.
