Market and Credit Risks	
<ul style="list-style-type: none"> • <u>You are exposed to Market Risks</u> <ul style="list-style-type: none"> o Prices of securities may go up or down in response to changes in economic conditions, interest rates and the market's perception of securities. These may cause the price of Units in the Sub-Fund to go up or down as the price of Units in the Sub-Fund is based on the current market value of the investments of the Sub-Fund. • <u>You are exposed to Currency Risks</u> <ul style="list-style-type: none"> o The net asset value per Unit of the Sub-Fund will be computed in its base currency i.e. Singapore Dollars whereas the investments held for the account of the Sub-Fund may be acquired in other currencies. Liquidity Risks	
<ul style="list-style-type: none"> • <u>You are exposed to Liquidity Risks</u> <ul style="list-style-type: none"> o Trading volume on stock exchanges in emerging markets can be substantially less than on the stock exchanges of the major markets, so that acquisition and disposal of holdings may be time consuming and/or may need to be conducted at unfavourable prices. o The Sub-Fund is not listed and you can redeem only on Dealing Days.

Where the Sub-Fund invests in Singapore, it will be exposed to fluctuations in the economy of Singapore, and the market, currency, political, social environment and other risks related specifically to Singapore, which may affect the market price of its investments in Singapore. Exposure to Singapore also increases the potential volatility of the Sub-Fund due to the increased concentration risk as it is less diversified compared to exposure to specific regional or global markets.
