### KEY PRODUCT FEATURES

**WHAT ARE YOU INVESTING IN?**

- ▶ You are investing in a sub-fund of BlackRock Global Funds (“BGF”).
- ▶ BGF is an open-ended investment company incorporated in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).
- ▶ Non-Distributing Shares do not pay dividends whereas Distributing Shares pay dividends
  - For Distributing (G), (R) and (S) Shares (if available): (i) dividends may come from capital of the Fund; (ii) this may reduce capital and the potential for capital growth of the Fund, and (iii) similar to other Distributing Shares, there is no guarantee of payout and the dividends may rise or fall.

Refer to “The Company” and “The Funds” on page 3 of the Singapore Prospectus for further information on features of the product.

<sup>1</sup> The Prospectus is available for collection at the offices of the Singapore Representative during normal business hours or accessible at [www.blackrock.com/sg](http://www.blackrock.com/sg).

Refer to “Investment Objective, Policy and Strategy” and “Use of Derivatives and Securities Lending” on pages 8 and 30 of the Singapore Prospectus for further information on investment strategy.

## KEY RISKS

### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The price of Shares of the Fund and any income from them may fall as well as rise.

**These risk factors may cause you to lose some or all of your investment.**

Refer to “Risk Factors” on page 26 of the Singapore Prospectus for further information on risks of the product

## Market and Credit Risks

### The Fund may be subject to Currency Risks

- ▶ Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risks.
- ▶ For Hedged Share Classes, while the Fund attempts to hedge currency risks, there can be no guarantee that it will be successful in doing so.

### The Fund may be subject to Emerging Market Risks

- ▶ The Fund may invest in one or more emerging markets and may be subject to a higher than average volatility than investing in more developed markets due to greater political, tax, economic, social, foreign exchange, custodial, liquidity, regulatory or other risks.

### The Fund may be subject to Foreign Investment Restrictions Risks

- ▶ Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the Fund.

## Liquidity Risks

- ▶ Redemptions may be suspended in certain circumstances detailed in the Prospectus.

## Product Specific Risks

### The Fund may be subject to Capital Growth Risks

- ▶ The Fund pursues an investment strategy in order to generate income and may pay dividends from capital or net gains, which may reduce capital and the potential for capital growth and future income of the Fund.

### The Fund may be subject to Derivatives Risks

- ▶ The use of derivatives may expose the Fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can hence increase the Fund's volatility. The Fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.
- ▶ The Fund may also use derivatives to facilitate more complex efficient portfolio management techniques.

### The Fund may be subject to the risks of Securities Lending

- ▶ The Fund may engage in securities lending. As such, the Fund will have a credit risk exposure to the counterparties to any securities lending contract. The Fund's investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund.

### The Fund may be subject to Smaller Capitalisation Companies Risks

- ▶ The Fund may invest in small cap companies. Such investments may have higher than average volatility and liquidity risks.
